LIST OF SOURCES

A. Major Suppliers of Driver Education Materials

The following are lists of firms who advertise films or other driver education materials free, or for rental or purchase. However, those who wish to receive films from distributors on a free rental basis should be aware that increased interest in driver training is taxing such sources to the limit. Agencies such as Alberta Government Telephones, The Alberta Safety Council, and Insurance Bureau of Canada, which possess limited libraries of film and have in the past supplied schools with film may find it difficult in future to supply schools due to the number of driver education programs being initiated across the Province.

(Each supplier listed is given a code number which is used in the resource list instead of the full name.)
